

DID YOU KNOW?

WASTING FOOD FEEDS CLIMATE CHANGE.

30% of global greenhouse gases come from producing our food – we can't afford to waste it.

CAN YOU DESIGN A NEW, TASTY RECIPE FROM FOOD LEFTOVERS?

The best entries will be produced as recipe cards and made available to schools and community groups across the North West region.

All entries can count towards Children's University credit and if you go to a Sefton School you will also win your school Eco Savers League points!

Tag us into any tweets of you making your recipe @ Eco_Centre #FoodWasteActionWeek

Closing date for entries is the 28th March. Please send your recipes to teachers@southportecocentre.com
